DETAILED ACTION***Claim Objections***

1. Claims 17-31 are objected to as being drawn to compounds in the context of a product-by-process claim format. The objection is based on the fact that the compounds produced by the process are definite as to their meaning. As such, claims to the compounds can stand-alone. Product-by-process claim language is reserved for situations where the compound cannot be claimed in a definite manner. The instant application does not fall into this category, as the compounds are definite. Further, there is no showing that the process of making imparts new and unobvious properties to the compounds themselves.

Therefore, product-by-process claims 17-31 will be treated as compound claims for the purpose of this examination.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 17-32 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Knowlton (US-5,981,781).

US'781 teaches a soybean oil which has not been hydrogenated that reads on the instant invention. A claim to a composition defined by reference to the process by which it is produced, is not limited to compositions produced by the process recited in the claim.

Art Unit: 1621

Therefore, process limitations cannot impart patentability to a product that is not patentably distinguished over the prior art.
